REASON FOR REFUND

If the registration plate has never been affixed to the vehicle or in the event you have a sticker that has never been affixed to the plate and you have not been issued a temporary plate to be used pending receipt of a sticker, you may return it with this application for refund to the address listed below.

Once the plate has been placed on the vehicle or the sticker has been attached to the plate, it is automatically classified as used. The Vehicle Code makes no provisions for refund of fees, either totally or partially on used registration plates or stickers, regardless how short a time they have been used.

If you have submitted an application for a plate or sticker which you have not received and no longer need, you can apply for a refund by submitting a copy of the front and reverse side of your cancelled check or a copy of the original cancelled money order sent in payment.
